

KLEENair Vacuum Grain Screener

- ***The simplest way to screen multiple grains as it leaves a dryer***
- ***Moves fines and bees wings up 200' away with 5 HP Blower unit***
- ***Single and Three Phase availability***
- ***Cleaning capacities up to 4,770 BPH***
- ***Nylon brush Tipped augers***
- ***Heavy duty Flighting***
- ***Clean grain from any source with a Self-Powered unit***
- ***Two Model options:***
 - Basic In-Line units***
8",10", and 14" Diameter
 - Self-Powered Universal units***
10" and 14" Diameter

Product Specifications

- 8" & 10" Basic In-Line KLEENair is 48" long
- Requires 16" minimum elevation from foundation
- 14" Basic in-Line KLEENair is 66" long
- Requires 20" minimum elevation from foundation
- 10" Self-Powered KLEENair is 9'2" long
- 14" Self-Powered KLEENair is 10'11" long

	8"	10"	14"
Maximum Cleaning Capacity (Dry Corn)	845	2275	4770
Minimum Blower HP	1	3	5
Horizontal Distance	100' (4" discharge)	100' (6" discharge)	225' (6" discharge)
Vertical Distance	50'	50'	100'

Capacity is based upon 45% loading factor of cleaner, operating horizontally processing cool dry corn. Cleaning performance will be restricted if grain is above 15% moisture. IF screener unit is on an incline, capacity is reduced as well as decreases the life of the brush auger

BASIC IN-LINE KLEENair

SELF-POWERED KLEENair
